WHAT EACH JAVAFX COMPONENT DOES

- Stage: The Stage is the top-level container that represents the main window of the application, which holds all the visual content.

- Scene: The Scene represents the entire contents inside the Stage (the window), which contains all the UL controls like buttons, text fields, and tables.

- Table View: A Table View is a control that displays data in a structured table format with rows and columns, allowing users to view and interact with multiple records.
